

## Focus on the students

Lolland International School is committed to ensuring that all children feel safe, secure and happy so that they can grow, learn and be challenged in an environment which encourages the development of the whole child.

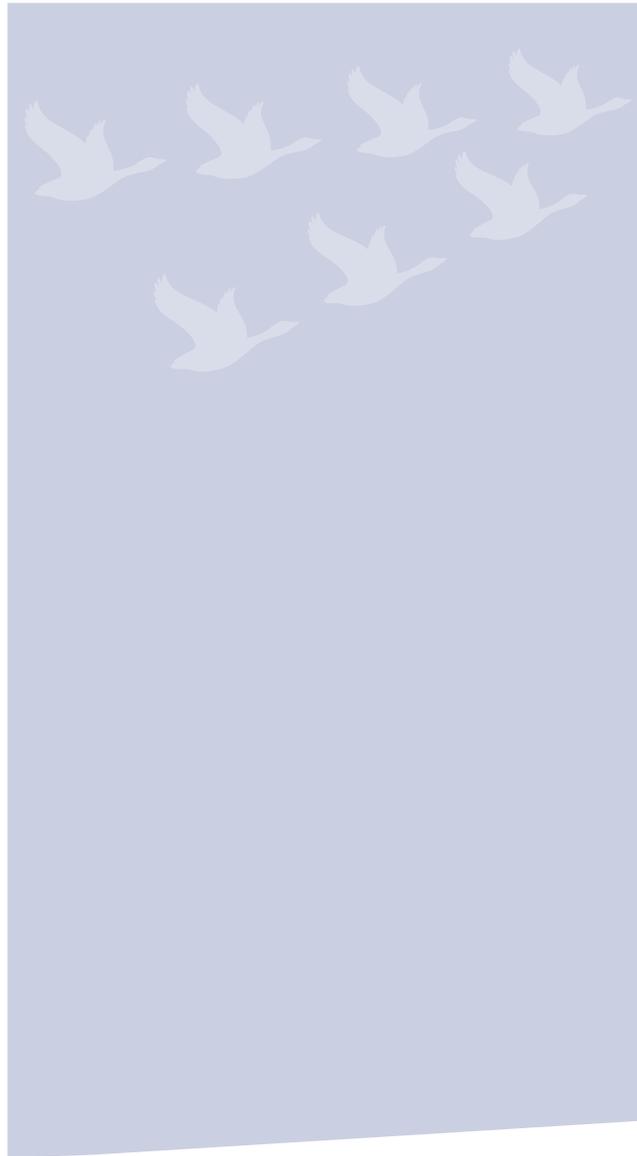

Students are taught and cared for by teachers who want the best for their students. We place a strong focus on personal development and the wellbeing of each student. We value each child as an individual and work hard to nurture his or her personal strengths and interests.

## Our values

Our school values are an integral part of who we are and that we believe are important. Values have a major influence on a person's behaviour and attitude. Every day and every moment they serve as broad guidelines in all situations in guiding us in the choices we make and the actions we take.

As a school community, we embrace a partnership of lifelong learning to be able to contribute as a global citizen in the community and in the future, complex and changing world.

- **Community: 'Sharing, working and learning together'.** We are diverse people linked by a common perspective, engaging in joint action to make a positive difference.
- **Resilience: 'We are brave when faced with challenges'.** We work hard, take care of ourselves and those around us, and bounce back from failure.
- **Curiosity: 'Being interested and engaged in learning new things'.** We are using our thinking skills to be creative and critical.

## Welcome

Lolland International School is the first municipal, international school in Denmark. It is a free offer, where the students will follow a bilingual programme and be taught in an international environment.

We provide the best of the Cambridge International curriculum and the Danish national curriculum. Mathematics, Science and English are taught in English, whereas we teach the other subjects in Danish.

The bilingual approach will give the student strong linguistic skills, a global perspective, cultural sensitivity, and ample opportunities to continue further education in Denmark or abroad.

Students at Lolland International School will also encounter other cultures, for example among their classmates, there may be students from a large part of the world. A student with us thus becomes a world student in a global classroom.

## Our location

The school is centrally located in the city of Maribo in Lolland, close to both highway and train connections.

Moreover, the school lies adjacent to Maribo Gymnasium and another public school, with ample opportunities for community and cooperation.

Nature is also right on our doorstep - with everything from large fields, forests and lakes to historic manor landscapes.

## Meet a family

Annelies and Bart-Jan are parents of 9-year-old Daan, 7-year-old Jasper and 4-year old Lars.

They are from the Netherlands, but are currently living in Lolland because Bart-Jan is working on the Femern-connection. Daan and Jasper are therefore enrolled in Lolland International School, and Lars will join the school as well, when he gets older.

“The important thing for us is to become part of the local community and that our kids will be able to become part of that as well”.

To Bart-Jan the school’s bilingual model is a big plus: “We like the bilingual programme as it is essential that our children learn English, mainly a benefit for their future, as well as learning Danish, as that will help them in their daily life while we are in Denmark.”

Daan and Jasper are also looking forward to begin at Lolland International School. They expect it to be a lot of fun:

“We hope we will have long breaks during school time to play outside and play soccer with our new friends”, Daan says.

### Dominic Maher, Principal:

“We look forward to welcoming you at Lolland International School. I’ll be happy to answer any questions, that you may have”.

## New student?

The school is open for grades 0-9. The law on international primary and lower secondary schools stipulates that more than half of the school’s students should be from families where one or both parents have an international background. Danish students are also welcome if there are spaces available.

Check out our website for more information and to register for our next Open House.
